

**TITLE: Self Sufficiency**

---

The Hawaii Teacher Standards Board supports changing the funding sources for the HTSB from special fund and general funds, to complete self sufficiency by funding all expenses of the HTSB through its special fund. In order to accomplish this, the Executive Director is to work with the DOE in preparing a supplemental budget request for the 2012 Legislature that will raise its special fund budget ceiling to fund all current general fund expenditures and transfer general funded positions to the special fund. The proposed effective date for self sufficiency will be with the new FY 2013. Implementation will only be upon approval of this supplemental budget request by the Legislature and the Governor.
